

Nutritional Support to Maintain Normal Blood Sugar

GLUCOBETIC®

Normal Blood Sugar Balance Critical to Long-Term Quality of Life

Maintaining healthy blood sugar levels in the normal range is not only critical for energy and mood, but also for cardiovascular, nervous system, and immune health. Since the typical diet is high in refined carbohydrates and sugars, it's no wonder that such a high proportion of our population has concerns about how diet affects blood sugar. **Hectic lifestyles, chronic stress, and genetic predispositions can also easily affect the delicate balance that influences glucose and insulin levels.** That's why Flourish Wellness offers Glucobetic to support key areas of normal glucose metabolism.

Blood sugar levels that are kept in the normal range allow the body to function as it should, with **sustained energy, food cravings at bay, even moods, mental clarity and optimal immunity.**

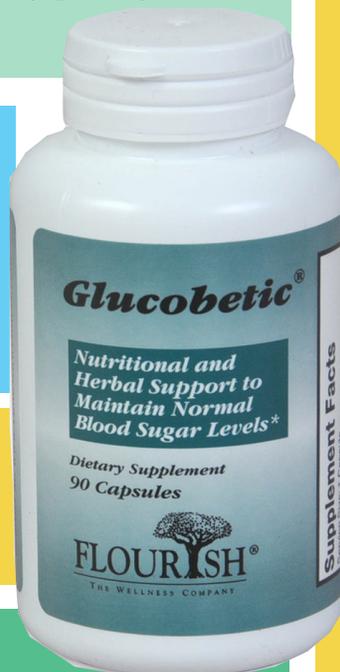

In addition to exercise and monitoring the diet, there are nutritional measures you can take to support the normal functioning of the pancreas and the ability of cells to process blood sugar. **Glucobetic®** combines these herbs and minerals into one product that results in a comprehensive approach to maintaining normal blood sugar levels.*

All herbs and raw materials in **Glucobetic®** pass microbiological testing, herb identity and other testing according to strict standards so that you can be confident of our product quality, potency and purity.*

Recommendations:

Take one capsule, twice daily between meals, or as otherwise directed by your healthcare professional. Dosage may be increased to three capsules daily, if needed.

GLUCOBETIC IS WORTH EVERY NICKEL

Glucobetic is an amazing formula! I've been health conscious for many years and paying attention to diet, exercise and good nutrition. Some time ago, I stumbled across Glucobetic, and thought "why not try it"? Any-one interested in maintaining healthy blood sugar levels should use this product. It's worth every nickel to preserve my health as long as possible. I can't recommend Glucobetic enough.**
