“Stay Well” all Year

Power Up Your Immune System

Supplements have been proven to be a very effective way of strengthening your immune system. However, no single nutrient can give you all of the protection you need from the massive amounts of germs and viruses you encounter on a daily basis. That’s why we formulated our powerful **Immune Support** formula, which is a synergistic blend of 20 vitamins, minerals, glandulars, herbs and more which research indicates to support optimal immune function and respiratory health. Immune Support was designed to bolster resistance to infection year round, and especially during changes in season. One of the most potent ingredients in our **Immune Support** formula is bovine Thymus concentrate. The thymus gland is a key player in the immune system’s arsenal. The thymus houses T-cells, one of the major components of the immune system. T-cells destroy pathogens that cause disease, as well as the cells affected by those pathogens. As you age, your T-cells become less effective, and parts of your immune system may not work as effectively. Our Thymus tissue is teamed with Spleen and Pituitary to maximize support for optimal immune function.

Why Choose Immune Support?

- Strengthen the Body’s Natural Immune Defenses
- Potent Thymus, Spleen & Pituitary Glandulars
- Comprehensive Formula - Blend of 20 Synergistic Ingredients

Immune Support Formula (60 Tablets)

Each 2 Tablets Contain:
