

Probiotic Digestive Support

Targets, Gas, Bloating & Difficult Digestion*

Two Powerful Products in One Amazing Formula Probiotics and Digestive Enzymes

- Targets Difficult Digestion
- More Complete Nutrient Absorption
- Regulates Normal Bowel Movements
- Targets Troublesome Food
- Maintains Balance of Healthy Bacteria

Probiotic Digestive Support contains 9 targeted enzymes, both pre and probiotics with a whopping “2 billion” friendly bacteria from Lactobacillus Acidophilus and Lactobacillus Bifidus along with Peppermint to calm and sooth the stomach.

Probiotics and digestive enzymes work in different, but complimentary ways. Probiotics are “beneficial” bacteria that live in our intestinal system and help keep it functioning properly. Gas, bloating and digestive distress are telltale signs that your system is not in balance.

Digestive enzymes act like “scissors” breaking food down into simpler forms that can be absorbed. As we age, our enzyme production declines making digestion more difficult. **Probiotic Digestive Support** contains only high quality vegetable-source enzymes that work to break down protein, carbohydrates, fats, difficult starches and dairy products.

According to the National Institutes of Health, 60 - 70 million Americans are affected each year by digestive issues.

Bottom Line: If you are over 40 and want to continue to have optimal digestion and bowel health, maintaining proper levels of both digestive enzymes and probiotics are a necessity.

Comprehensive Formula – Value Priced at \$27.95

Recommendations: Take 1 capsule with meals or as otherwise directed by your healthcare professional. Dosage may be increased to 2 capsules per meal for additional digestive support.
