

* Improved Formula * Easy-to-Swallow "Capsules"

Don't let Aging Eyes dim your future!!

Total nutrition for EVERY PART of your eye means stronger, healthier, simply better eyes. That's the power of **Ocu-Betic**.

Ocu-Betic®

Advanced Nutrition for Eye Health*

Every part of your eye deserves to be healthy

Item # 131
60 Tablets

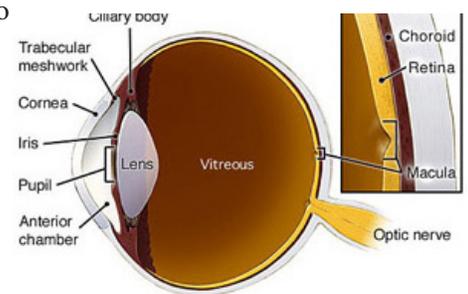

With your eyes, it makes very little sense to play favorites. Don't nourish your retinas with just Lutein alone, when your lenses need **Vitamin C** and **Vitamin A**. Don't simply take antioxidants to combat free radicals, when you need **Ginkgo** and **Bilberry** to help support circulation to your eyes, so protection arrives when and where it's needed. Every part of your eye needs nourishment, and that is why we made it our mission to include powerful nutrients that target each one, all in **Ocu-Betic**. (Ingredient Listing on the reverse side)

You might not believe the difference!

Clear focus starts with a healthy lens and macula

The lens' job is to make sure light rays reflected off the objects we're trying to see come into sharp focus. And the macula, the highly sensitive portion of the retina, is also responsible for vital focusing vision.

When we use our eyes to drive, read a book or even gaze at a loved one, the macula is critically important. Together, these parts of your eyes are where visual acuity and sharpness, the true nature of clear sight, come together. And fortunately for us, nutritional science holds the key to supporting them.

Now with "double" the **Lutein** and **Zeaxanthin** to help maintain proper lens density, and shield both the lens and macula from free-radical damage.

Some formulas stop there...

But **Ocu-Betic**® goes further, with **Vitamin E**, which studies show helps maintain lens clarity. With **N-Acetyl Cysteine**, which boosts your body's ability to produce glutathione, the principal protective compound found naturally in the eye. And with **Quercetin**, which supports lens transparency and clarity. For additional protection, we've added **Quercetin**, **Eyebright**, **Selenium** and **Zinc**, which together add another solid layer of protection and support.

Ocu-Betic® - Nutritional Support for Healthy Eyes

Taking good care of your eyes is a vital aspect of healthy aging, and prevention is of key importance. The American Optometric Association estimates that less than 1/3 of Americans improve their nutrition to help ward off or cope with vision loss. Yet studies have shown that specific nutrients and herbs can combat age-related vision loss.

Bottom Line: If you want to retain your ability to see clearly as you age, be sure that you are getting the nutritional support you need. It's never too late to start!

Ocu-Betic Formula

Item # 6829

60 Capsules

Supplement Facts
