Immune Support

Dietary Supplement

“Stay Well” all Year

Power Up Your Immune System

The immune system is our body's frontline of defense. It protects us whenever possible, but it is frequently undermined by stress, poor diet and fatigue. During these challenging times, staying well is a top priority. The good news is, your immune system is wonderfully effective when it's working the way it was designed to, but it often needs a boost to keep it functioning optimally.

That's why we formulated our powerful **Immune Support** formula, which is a synergistic blend of 19 vitamins, minerals, glandulars, herbs and more which research indicates to support optimal immune function and respiratory health. Immune Support was designed to bolster resistance year round, and especially during changes in season. One of the most potent ingredients in our **Immune Support** formula is bovine Thymus concentrate. The thymus gland is a key player in the immune system's arsenal. The thymus houses T-cells, one of the major components of the immune system. As you age, your T-cells become less effective, and parts of your immune system may not work as effectively. Our Thymus tissue is teamed with Spleen and Pituitary to maximize support for optimal immune function.

Why Choose Immune Support?

- Strengthen the Body's Natural Immune Defenses
- Potent Thymus, Spleen & Pituitary Glandulars
- Comprehensive Formula - Blend of 19 Synergistic Ingredients

**Comprehensive
Formula**

Item # 6804
60 Tablets
