

# Don't let seasonal **Allergies** ruin your day!

## Aller-Rescue can help!

- ✓ Relieve seasonal and everyday allergies
- ✓ Promote normal mucus levels
- ✓ Maintain free breathing and clear sinuses
- ✓ Support a healthy respiratory system
- ✓ Maintain an optimal response to histamines

## Aller-Rescue Addresses Allergies the “Natural” Way

Allergic Rhinitis affects approximately 60 million Americans and results in over 12 million doctor visits per year. People with allergies think their only choices are to be miserable, take drugs or stay inside.

A runny nose, itchy eyes or throat and that foggy-headed feeling that are so bothersome during peak seasons can quickly ruin your day. But there are natural ways to tweak your immune system so it is not so sensitive to pollen, pet hair, dust and such.

**Aller-Rescue** gives you complete nutritional support for your entire respiratory system so you can breathe freely and naturally. This advanced formula delivers a powerful combination of 10 targeted nutrients that help keep your breathing passages open, support normal mucus levels and fortify your immune system so it can be better able to cope with allergic stressors.

Whether you are plagued with everyday or seasonal allergies, a healthy respiratory system can make all the difference in how you feel. **Aller-Rescue** offers a revolutionary approach to keeping your lungs and sinuses healthy and it promotes clear breathing each and every day. It takes respiratory health to the next level, with an extraordinary formula you won't find anywhere else.

**When allergies attack - Fight back with more than a tissue!**

# Aller-Rescue - 60 Tablets

## Ingredient Listing

Each two tablets of **Aller-Rescue** contains:

- 1. Butterbur Extract** - Highly effective botanical to promote free breathing and regulate normal histamine response with no sedative effect. Histamines can cause an overreaction of the immune system triggering allergy symptoms.  
50 mg per serving.
- 2. Elderberry Extract** - Supports the immune system and normal inflammatory response, optimizes sinus drainage, clear sinuses and overall respiratory health.  
50 mg per serving.
- 3. Quercetin** - By inhibiting the release of histamines and other inflammatory compounds, Quercetin regulates the allergic-inflammatory response that causes itchy eyes and runny nose.  
400 mg per serving.
- 4. Rutin** - A plant compound that is an important component of the Vitamin C complex of nutrients. Rutin regulates release of histamines to support normal response to allergens.  
50 mg per serving.
- 5. Bioflavonoids** - Increasing your intake of Bioflavonoids helps prevent the formation of histamines, as opposed to over-the-counter anti-histamines that act to interfere with histamine's action after it has been produced. It helps maintain normal nasal tissues, rather a swollen and congested feeling.  
400 mg per serving.
- 6. Bromelain** - A key enzyme from pineapple that helps the body absorb other nutrients, such as Quercetin. It also promotes normal inflammatory response and drainage of the sinuses.  
300 GDU per serving.
- 7. Vitamin A** (Beta Carotene) - Supports healthy bronchial passages and mucus membranes. Vitamin A works with other antioxidants to fortify the immune system so that it can optimally ward off infections.  
3,000 mcg RAE per serving.
- 8. Vitamin C** - A potent antioxidant that has the ability to support the body's natural production of interferon, a powerful antiviral substance. Vitamin C also acts as natural anti-histamine.  
500 mg per serving.
- 9. Vitamin D3** - Recent research has linked low levels of Vitamin D to allergic sensitivity, asthma severity and lower lung function. Vitamin D from Cholecalciferol has the best bioavailability.  
20 mcg per serving.
- 10. Zinc** - Supports the immune functioning of the thymus gland and the production of interferon. Over 90% of older Americans do not consume the minimum daily requirement of Zinc each day.  
15 mg per serving.
